

Practical Applications

Configuration and Operational Implementation

eSolve[®] is offering our **on-site** and remote **online support** to assist all agencies who have installed the software - with operational configuration and implementation readiness. If you are experiencing any difficulties with the software, we at eSolve[®] will provide you with telephone or e-mail assistance. In addition, we are here to help you install the application on your network and/ or locally on a workstation.

Experience first hand the benefits of eSolve[®]

Start using it operationally today!

Prior to any operational use of eSolve[®], there are a small number of steps that must take place to ease configuration. In essence, this converts eSolve[®] into a *Turn-Key* investigation management system. We are prepared to deliver these services to you immediately:

- Registration and Activation of the Software
- Installation of the software on your network and/or user workstations
- Configuration of users and security access protocols
- Development of investigation or project category templates
- Customization of the data entry selection list and linkages reason codes
- Delivery of user orientation and training
- Delivery of administrative level orientation and training
- Maximization of the collection and collation business rules
- Optimization of the data search, retrieval, and reporting process
- Confirmation of eSolve[®] operational readiness
