2007.06.10 - Pre-release 1.02

- Find routine modified to support traditional wildcards

2007.10.15 - Public Release 2.0.0

- Completed all Entity Forms
- Added Search Routine
- Added eRecord Content Extraction and Management
- Added Reporting from all Forms and Entities
- Added HTTPS (SSL) Secure Deployment option
- Enhanced System Administration functions
- MISC Bug Fixes

2007.11.05 - Public Release 2.0.1

- Minor Bug Fixes

2007.11.25 - Public Release 2.0.2

- Enhanced Installation Routine to allow Upgrades and Patches

2008.01.05 - Public Release 2.0.3

- Minor Bug Fix - List filters not applying consistently
- Changed all List Filter button texts from "Apply" to "Filter"

2008.02.15 - Public Release 2.0.4

- Minor Bug Fix - eRecord links not being displayed or processed correctly
- Added a "Restrict to Agency Data" flag to user accounts that restricts the data records displayed to only those associated to the user's agency.

Modified all reports to match this flag.

- Removed the "Show Users" option from the System Administration tree (replaced by the new user flag above)
